CLEANING & HYGIENE

Meeting Expectations

THE FOUR MAIN WAYS TO KEEP YOUR FOODSERVICE ESTABLISHMENT CLEAN AND SANITARY*

HAND WASHING — The primary method of preventing your staff and customers from getting an illness.

CLEANING SURFACES — Removing soils and food from surfaces is the most vital part of the hygiene process as it prevents pathogens from having an environment to thrive.

SANITIZING FOOD CONTACT SURFACES — Follow public health standards and requirements by lowering the number of germs on surfaces or objects to a safe level, but not as thoroughly as a disinfectant.

DISINFECTING TOUCH POINTS — Killing germs or pathogens on a surface after cleaning can further lower the risk of spreading infection.

THERMOGRIP™ ENTRANCE MATS *New Social Distancing Mats available now!*

We created our ThermoGrip™ bottom surface to be the strongest vinyl backed mat formulated with nitrile rubber to resist cracking in extreme temperatures. The Nitrile rubber gives the mat backing flexibility and strength to prevent the edging from becoming brittle in harsh weather and cracking or separating from the mat. The Vinyl gives the mat the sturdiness that allows the mat to be both rigid and flexible to prevent the edges from curling like you may find in many other floor mats. Crown's unique ThermoGrip™ technology helps keep the mats flat and to the floor surface. To increase the safety of entrance ways, ThermoGrip™ mats were designed to be the very best entrance mat to uphold to the high volumes of foot traffic.
